Orlando, Florida

Contract Value  
**\$2.7 M**

Architect  
**Brown + Company  
Architecture**

Square Foot  
**16,000 SF**

Type of Project  
**Groundup**

## Scope

Hanover contracted T&G to complete a high end Corporate office building with two warehouses attached. Planning for this project was crucial as the site is located next to an executive airport. Coordination with the FAA was necessary each time a lift or crane was to be used in an effort to redirect airplanes around the project.

The final product produced was a beautiful, contemporary, high end office. The polished concrete floors add a masculine touch to the beautiful finishes throughout. The offices houses a steam room, sauna, massage room, gym, employee lounge with bar, and high tech low voltage lighting. Upstairs are offices, conference rooms, restrooms, a 1/2 court basketball court, theater room with a high technology surround sound system. The 8,000 square foot warehouses are ADA compliant with custom millwork, lockers, a workshop and storage areas.
