Type of Project
Buildout

Scope

T&G was contracted by Orange County Convention Center to add 3 new open mezzanines with railings, swing gates and metal stairs. The biggest mezzanine has an existing electrical room and sits 40 ft above finished floor with 3 swing gates and 2 metal stairs. The second mezzanine is the smallest. T&G created a bridge to connect to the third mezzanine which had an existing platform. Additionally, in the third mezzanine new sprinklers, LED lights and modifications were added to the existing HVAC duct work.
