

# Walmart Full & Takeover Remodels

Florida & Texas

Contract Value  
**\$850 K & Up**

Architect  
**Corporate Designer**

Square Foot  
**201,000**

Type of Project  
**Renovation**

## Scope

Scheduling and details for these stores are among the toughest in the industry and their safety protocols exceed federal, state and local standards. Walmart typically requires a 24-hour work schedule, two meetings a day as well as intense coordination to schedule materials delivery. In addition, all stores require temporary walls to isolate construction, mini-mize disruption and maintain the safety of the customers and staff. Scope of the work can range from the installation of new flooring, constructing new restroom facilities, and relocation of refrigerated cases, to assembly of deli kitchen and installing pharmacy.

To date, T&G has successfully completed multiple remodels for this client throughout Florida and Texas. While each of these had extremely tight construction schedules, the original end-dates for these projects were never compromised. T&G is a preferred construction vendor for Walmart.
